

Aim: Getting familiar with an IDE including an ANSI-compliant C system, and implementing the first C program.

1. Print “Hello to C” on screen.
2. Write a program that asks user to enter a number and a character, and then prints them out. The output should be as follows:

```
Please enter a character: E
```

```
Please enter a number: 52
```

```
You have entered E and 52.
```
